

comforte Purchases SQL/MP and SQL/MX Seamless Intercept Technology from TANDsoft

TANDsoft Inc. is pleased to announce the sale to comforte AG of TANDsoft's Sensitive Data Intercept (SDI) for the exclusive use of tokenization and encryption of NonStop SQL/MX and NonStop SQL/MP data. SDI seamlessly intercepts SQL/MP and SQL/MX database access calls. It is an essential component in comforte's SecurDPS suite of data protection products. With the acquisition, comforte strengthens its position as the only vendor to offer transparent column level tokenization and encryption on HPE NonStop.

TANDsoft specializes in interception technology. NonStop customers use its solutions to enhance application functionality without the need for application modifications nor, for that matter, source code. comforte is a global leader in enterprise data security and cloud-native tokenization as well as connectivity and digital enablement solutions on HPE NonStop. They serve over 500 enterprise customers worldwide.

OEM partners since 2014, the two companies collaborated in the past to successfully implement the protection of NonStop SQL data for comforte customers. SDI's SQL/MP and SQL/MX components for column level interception now are the property of comforte.

In addition to the technology purchased by comforte, Sensitive Data Intercept serves as the foundation for several other TANDsoft products. For instance, SDI-Trace enables NonStop users of Enscribe, SQL/MP, and SQL/MX to view data written to and read from disk, to audit who or what is accessing sensitive data, and to log the dates and times of access.

The SecurDPS product suite provides the technology to protect sensitive data with minimal efforts and without changing existing applications. SecurDPS allows organizations to take complete control of their sensitive data, thereby lowering compliance costs and significantly reducing the risk of data breaches.

To learn more about any or all TANDsoft products, contact Jack Di Giacomo (+1 514-695-2234 / jack.digiacomo@tandsoft.com) or Dieter Orłowski (+1 303-263-4381 / dieter.orlowski@tandsoft.com.)

Contact comferte's Thomas Gloerfeld (+44 782 4818237 / t.gloerfeld@comferte.com) for information about SecurDPS, or visit www.comferte.com.

TANDsoft is a global provider of innovative HPE NonStop software solutions for use in time virtualization, application modernization, security, and business continuity. Many NonStop customers use our intercept technology to enhance application functionality with no program modifications. Check us out at www.tandsoft.com.
